

ENERGY STAR

Join Canon in making a difference with ENERGY STAR.

Go to: www.energystar.gov for more information.

To help you save energy and money, while making a difference for the environment, Canon has partnered voluntarily with the EPA for over ten years to design products that meet the high standards of its [ENERGY STAR®](#) Program. This program promotes the development and introduction of energy-efficient products to combat global warming and other environmental issues.

As an ENERGY STAR partner, and one of the leading producers of energy-efficient equipment, Canon has qualified more than 400 of its products since the program began and is proud to offer you copiers, printers, scanners, and multifunction devices that help protect the environment, without compromising features or performance.

Why buy ENERGY STAR?

ENERGY STAR equals saving money.

The typical home office with an ENERGY STAR qualified fax, printer, copier and scanner is projected to save more than \$230 over the life of the product. So start saving now by choosing Canon [ENERGY STAR-qualified Products](#).

Save Without Sacrifice

Canon ENERGY STAR qualified home and office equipment:

- Use half as much electricity than standard equipment
- Cost the same as less energy-efficient models

As higher energy cost and global warming become more of a concern for consumers, we are committed to offering solutions that help our customers save money, conserve energy and improve the quality of our environment.

"At the heart of Canon's commitment to the world community is the belief that we are building a better world for future generations."

-Yoroku Adachi, President and CEO, Canon U.S.A., Inc.
